

Illuminating the Path to a More Secure Future

TorchLight is a Complete Security Solutions Provider (CSSP) founded and built on the concept of providing a complete, turnkey, Design-Build-Manage (DBM) triad approach to cybersecurity solutions.

Torchlight has partnered with Cisco, the industry leading security technology company, to provide turnkey Cisco-as-a-Service cybersecurity solutions.

What We Do

Design, build, and manage cybersecurity solutions for clients.

How We Do It

Create a risk-aware strategy and continuous optimization aligned to business drivers.

Why We Do It

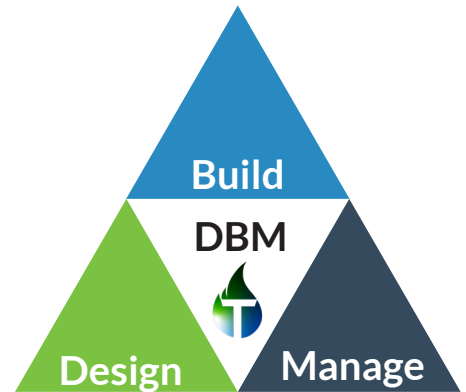

To make cybersecurity an enabler for business.

Design-Build-Manage (DBM Triad)

Design: Security begins with our Professional Security Services (PSS) advisors and consultants who understand you and your business information needs

Build: Next, security consultants will utilize Security Hardware and Software (SHS) capabilities to assist in leveraging your existing security platform or implementing a turnkey solution

Manage: Finally, the TorchLight Managed Security Services (MSS) team will monitor, manage, and maintain your cybersecurity solution

TorchLight Products and Services

PSS

Professional Security Services

Security Consulting
Advisory Services
Service Delivery

SHS

Security Hardware and Software

Secure Endpoint
Secure Email
Secure Firewall
Secure Workload
Secure Access
Secure Analytics

MSS

Managed Security Services

PathFinder SOC OS
Bring Your Own (BYOT) Platform
Modular Integrated Managed Security (MIMS) Bundles and Solutions

TorchLight | Why Us?

Risk-Aligned. Reward Defined.

Align cybersecurity to business strategy so your most important assets and critical vulnerabilities are defended.

Take control of the game. Focus on the risks that matter, not the threats that might not.

Deliver cybersecurity with context, for operational, business, legal, and other risks to the business, not just the IT.

Cyber-first for Every Next Decision.

Leverage the MIMS platform to streamline your complex environment so that it's cyber-agile, risk-aware, and breach-stopping.

Design and implement cybersecurity in alignment with NIST and other industry frameworks.

Deploy ZeroTrust, Ransomware Defense, and new AI/ML solutions. Find the right tool or process for your needs.

Cybersecurity for Business Assurance.

Make cybersecurity a path forward with new approaches to safeguard consumer trust.

We're cyber-focused on your business outcomes – helping businesses craft the best strategy for ROI, capturing funding, and growing onward and upward.

We break the C-suite's latest oddball brilliant ideas down in cyber terms so business changes don't compromise cybersecurity.

Illuminating Cyber Risk 24x7.

Torchlight provides 24x7 managed detection and response and other cybersecurity services from our SOC.

With a single pane of glass view to your cyber health, we always understand just where you are.

We offer more than security: cyber intelligence. We distill all data, alerts, and 24x7 monitoring into actionable insight, illuminating the risks that matter to your business.
